The family reads the happenings of their home community each week, as there are many paid correspondents throughout the community who send in all of the news of their districts at regular intervals.

The subscribers also appreciate the great advantage the Light has by being the rural publication of the Corsicana Daily Sun, which paper is an Associated Press Paper as well as having many other attractive and exclusive features.

Space will not permit going further as to what the Light stands for, as the large list of paid in advance subscribers is best evidence that the paper is what the people want, or they would not pay for it year in and year out, with the subscription list growing rapidly.

## The Advertiser Gets Full C overage.

In publishing a newspaper we manufacture advertising space to sell.

Its value is measured by the number of our readers plus their interest and confidence in the paper they have selected as "theirs."

Their purchase of it constitutes their invitation to you to put your business message before them through its columns.

When they sit down to read it they are in the mood for news—your news, if you have any. This means that they'll read it gladly and responsively.

Even a personal letter from you might not happen to reach them when they're in so favorable a mood as when they read their newspaper.

The reader's mood for news is therefore one of the things we sell in selling advertising space.

The Semi-Weekly Morning Light has been, and will always be, for a permanent good roads system, and for all progressive moves for the upbuilding of the community.

The demonstration began as Mr and Mrs. Baldwin left the mine offices, where they had inquired about the progress of the rescue work and voiced their sympathy for the stricken.

Emerging from the offices, they found a crowd of several hundred persons awaiting them. There were some exclamations in Welsh and then a voice was heard above all the others, crying excitedly in English: "What about the men lying in the black vein?" Face Hostile Crowd.

For a moment or two the Prime Minister and his wife stood alone in the face of hostility while their car was being brought around. Mrs. seemed on the verge of tears clutching her husband's arm.

When they had entered the car-she sank back with an expression of pained amusement. The Premier, although nale and also evidently agitated, continued smoking his pipe. As they departed, there was renewed shouting.

Despite the demonstration the Baldwins later drove to several stricken homes, where the Premier's wife spoke to women who had lost husbands and sons.

Meanwhile, bodies were being

brought up from the nearby pit.

All night long rescue parties had labored feverishly to drive their way through the rocks blocking them from the entombed men although experts said there was no hope that any were alive.
